

Mazin Yaser Hamdy

Data Science & ML Engineer

Fayoum, Egypt | mazinyaser0@gmail.com | +20 106 368 2101 | [GitHub](#) | <https://www.linkedin.com/in/mazinyaser>

Summary

Data Science & Machine Learning Engineer with hands-on experience in building end-to-end AI solutions. Skilled in data analysis, machine learning, and deep learning using Python and modern frameworks. Experienced in working with real-world datasets, improving model performance, and deploying interactive applications. Passionate about leveraging data to solve real-world problems and deliver impactful insights.

Experience

Generative AI Training – Digital Egypt Pioneers Program (DEPI) · *Generative AI Professional* Nov 2025 – Jul 2026

Completed intensive Generative AI training at DEPI, gaining practical experience in:

- LLMs - prompt engineering - model fine-tuning - building AI-driven applications
- Completed 3+ generative AI projects involving text, image, and code generation
- Applied prompt engineering techniques to improve output quality by 30%+
- Fine-tuned LLMs on custom datasets for specific use cases

Deep Learning Training – Epsilon AI Academy Egypt · *Certified Deep Learning Professional* Jan 2026

Worked on real-world datasets and built end-to-end deep learning pipelines using Python, TensorFlow, and Keras, especially in Computer Vision and Predictive Modeling:

- Built **5+ end-to-end deep learning models** using TensorFlow & Keras
- Achieved **up to 90%+ accuracy** on computer vision tasks - Processed datasets with **10K+ samples**
- Trained models on datasets with **10K–50K+ images** - Improved model accuracy by **15% using hyperparameter tuning**

Data Science Training – Epsilon AI Academy Egypt · *Certified Data Scientist Professional* Oct 2025

- Built and optimized 8+ ML models for classification & prediction
- Improved model performance by 20–30% using feature engineering
- Analyzed datasets with 10,000+ rows using Pandas & NumPy
- Reduced model error rate by **15%** - Visualized insights using **5+ dashboards/charts**

AI Training (90 hours) – Information Technology Institute (ITI) Jul – Aug 2025

- Completed **90-hour intensive AI program** covering ML & Deep Learning
- Delivered **1 end-to-end AI project** with full pipeline - Applied EDA and preprocessing on **real-world datasets**
- Delivered **1 end-to-end AI project with 85%+ accuracy** - Applied preprocessing techniques reducing noise by 20%

AI Training – Zewail's City & Impact Platform **50-hour training** · *Certificate of Achievement* Nov 2023

- Hands-on training in Machine Learning and AI using Python; built and evaluated ML models on real datasets
- Performed data preprocessing, feature engineering, and EDA
- Built and evaluated **3+ ML models achieving up to 90% accuracy** - Processed datasets with **5K+ records**

Education

Bachelor's Degree in Computers and Information Technology (Information Technology) 2022 – 2026

Egyptian E-Learning University – Joint Program with Fayoum University

- Graduated July 2026 · Graduation Project: Excellent

Additional Certifications

Getting Started with Deep Learning – NVIDIA Aug 2025

Python Programming Basics – ITI Mahara-Tech Aug 2025

IT Specialist: Device Configuration & Management – Certiport Sep 2025

Data Analysis – Microsoft · CARE Egypt · MCIT (Tawasayar) Sep 2025

Introduction to Python Programming – Edraak Dec 2024

Technical Skills

- **Programming Languages** : Python, Java, SQL, C++, JavaScript.
- **Libraries & Frameworks** : Pandas, NumPy, Seaborn, Matplotlib, Plotly, Streamlit, Scikit-Learn, TensorFlow, PyTorch.
- **Tools & Environments** : VS Code, Anaconda, Google Colab, Git, GitHub, Kaggle, PyCharm, IntelliJ.

Soft Skills

- Decision-making • Problem-solving • Critical thinking • Communication • Teamwork • Time management • Adaptability
-

Projects

[Melbourne Houses Price Prediction](#)

- Built an end-to-end ML model for Melbourne house price prediction using Kaggle data, achieving **94% accuracy**, with preprocessing, feature engineering, and a Streamlit app using Python, Pandas, NumPy, Scikit-learn, and Streamlit.

[American Sign Language \(ASL\) Alphabet Recognition](#)

- Developed a CNN-based deep learning model for ASL alphabet recognition (36 classes: A-Z, 0-9), achieving **98% accuracy** using TensorFlow, Keras, and Python.

[Advanced Snake Game with AI Playing Mode](#)

- Developed an AI-based Snake game using Greedy Best-First Search for autonomous navigation, with dynamic difficulty levels, reward system (golden fruits), and an interactive UI using Python and Pygame.

[Fraud Detection in Vehicle Insurance Claims using Machine Learning & Streamlit](#)

- Built an end-to-end ML model for vehicle insurance fraud detection, achieving **95% accuracy**, with data preprocessing, feature engineering, and a Streamlit web app using Python, Pandas, NumPy, Scikit-learn, and Streamlit.

[Plant Disease Detection](#)

- Developed a plant disease detection model using EfficientNetB4 with transfer learning, achieving **98% accuracy** in image classification using Python, TensorFlow, Keras, and OpenCV.
